Over the last several years, since hurricane Sandy, the response of our membership to our request for funds to build up our reserves has been gratifying and significant. We are continuing to solicit funds to maintain our reserves to ensure that we can respond quickly to any future storm or disasters well, as to continue to maintain our properties.

*\*Membership fees have not been raised in years, while at the same time the expenses to maintain our three properties have risen. There have been increases for maintenance, taxes and other miscellaneous items. We all appreciate the additional generous donations our members have made along with the countless hours from our volunteers. To ensure we are able to continue to maintain the beach access parking lots and Mathews Point, we need to increase the fees this year. Whether you use the beach access and the park and playground or not, our property values all benefit from them. As members of the community we are all responsible to share in the expenses involved and your membership dollars and donations are how these properties are maintained. Everything we do is managed by volunteers so there are no administrative charges in maintaining and operating these amenities.*
